

# WHAT ARE YOU FEEDING YOUR CHILD?

12 MILLION... THE NUMBER OF TEENS AND CHILDREN WHO ARE OBESE OR OVERWEIGHT.

We say we'd do anything for our kids... but what if we're doing too much?

Check out the ingredients on your kids' favorite foods and you might see words like...

**High Fructose Corn Syrup, Monosodium Glutamate (MSG), Hydrogenated Oil or Partially Hydrogenated Oil, Sodium Nitrite, Aspartame, Potassium Bromate.** These scary sounding words have actually been called, "fat foods" because they can lead to obesity. Worse yet, they could actually be making your child sick. Cardiovascular disease, diabetes, bone and joint problems, sleep apnea, and social and psychological problems such as stigmatization and poor self-esteem, are just some of the health problems associated with childhood obesity.

At Isagenix®, we believe developing healthy habits early is key to stemming the obesity epidemic.

Our products aren't just for grown ups. Now you can nourish your little one with our kid-approved line of good-for-you products. Best of all, you won't break the bank with Isagenix. An IsaLean® Shake (one of our pillars of health and a complete meal) costs less than \$3.00!
